
JOHN RAYMOND M. NIETO

Santa Maria, Bulacan • nietojohnraymond0918@gmail.com • 0998-920-7040

Education

STI College Santa Maria

Bachelor of Science in Information Technology

Santa Maria, Bulacan

June 2026

Grace of Shekinah School

Senior High School – STEM Strand

Santa Maria, Bulacan

April 2022

Experience

Department of Information and Communication Technology - Regional office III

Santa Rita, Guiguinto, Bulacan

Web Developer

February 2026 – May 2026

- Developed full-stack web applications using PHP Laravel, Livewire, Tailwind CSS, JavaScript, and HTML to build responsive and interactive systems and convert Figma designs into functional interface using VS Code, Cursor, Windsurf, GitHub Copilot, and GitHub to improve coding, design review, version control, and collaboration.
- Contributed to the development of DILMS Timekeep and PRS (Product Request System), strengthening front-end, back-end, and component-based development skills.
- Applied classroom knowledge in real-world ICT projects while gaining experience in testing, troubleshooting, documentation, and deployment support.

Public Employment Service Office

Santa Maria, Bulacan

Data Encoder

June 2025- July 2025

- Encode maintained accurate records for master lists, SPES beneficiaries, and skills training programs using Microsoft Excel.
 - Helped to revise and maintain beneficiary data in government employment and training programs.
 - Improved data organization by structuring spreadsheets for easier tracking and reporting
-

Projects

DILMS Timekeep

- Developed a timekeeping system during my OJT internship using PHP Laravel with Livewire. I also use tailwind css for translating the Figma into code.
- Built features for tracking attendance and managing OJT's daily time records.
- Worked on both front-end and back-end tasks to improve system function and user experience and collaborate ideas on testing, fixes, and system improvements during development.

PRS (Product Request System)

- Develop a web-based request system for managing product requests and approvals.
- Converted Figma designs into responsive and working pages.
- Used Laravel, Livewire, Tailwind CSS, JavaScript, and HTML to build the system interface and features.

AlpHAbet – Capstone Project

- Developed a School Portal System for Holy Family Academy of Santa Maria Bulacan Inc. that integrates essential modules including Administrative Functions, Pre-Enrollment, Document Upload and Verification, Hiring and Application Process, and Application Status Tracking.
 - The system was developed using HTML, CSS, JavaScript, Node.js, and Express.js, with Firebase as the database management and storage solutions.
-

Skills & Interests

Technical: HTML, CSS, JavaScript, PHP, Laravel, Node.js, Express.js, React.js, MySQL, Firebase, MongoDB

Language: Filipino, English

Tools: GitHub, Visual Studio Code, GitHub Copilot, Cursor, Codex
